Professional Summary

Aspiring Software Developer currently pursuing an M.Sc. in Computer Science, with hands-on experience in building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing scalable and responsive web solutions, designing RESTful APIs, and managing databases efficiently. Strong foundation in JavaScript, data structures, backend development, and modern frontend frameworks, with a keen interest in creating robust, user-centric applications and solving real-world problems through efficient and maintainable code.

Education

M.Sc. Computer Science	2025 – 2027
Kalinga University, Raipur	CGPA: 8.08

Technical Skills

Programming: Python, SQL, C, C++, Java, JavaScript
TECH STACK: MERN STACK(MongoDB, Expressjs, React, Nodejs)
Machine Learning: Supervised Learning, Unsupervised Learning, Predictive Modeling, Model Optimization, Hyperparameter Tuning, Cross-Validation
Deep Learning: ANN, CNN, RNN, TensorFlow
Tools: Git, Jupyter Notebook, GitHub, MySQL

Internship Experience

Full Stack Developer — Ibtidaa Tech

- During this journey, I gained hands-on experience in building and deploying scalable web applications, working across both frontend and backend technologies, and collaborating on real-world projects.

Projects

Video Call App

- Built a full-stack video calling application using WebRTC and Socket.IO, focusing on real-time, low-latency communication. This project helped me deeply understand WebRTC signaling, peer-to-peer connections, ICE candidates, and real-time event handling.

Car Rental App

- Developed a full-stack Car Rental Web Application using the MERN stack (MongoDB, Express.js, React.js, Node.js) that allows users to browse, book, and manage car rentals seamlessly through an intuitive and responsive interface.

Airbnb Clone App

- Developed a full-stack Airbnb Clone web application that allows users to list, and explore through a dynamic and user-friendly platform.
